

GBC Falcon 3064WF-1

3600264

Product Description

Latest generation technology for thermal and cold lamination and mounting of inkjet and photographic images up to 64" wide and 1" thick. The Falcon 3064 is the ideal finishing system for maximum control and capability in lamination. Bi-directional operation is further enhanced by the repositionable foot pedal and adjustable nip rollers to enable pressure-sensitive lamination and mounting operations immediately following thermal jobs. No need to wait for the rollers to cool down. The addition of the patented Advanced Electrical Safety System allows you to maximize the output quality without jeopardizing safety. The new AES System consists of three components- fiber optic detection, dynamic braking, and dual processor. These features work together to immediately stop the rollers once an obstruction is detected to provide the ultimate in safety.

Each information

Depth	54"
Width	89.5"
Height	71"
Gross weight	1786lbs
UPC#	033816435865
Unit quantity	1

Features

- Multiple unwinds and rewinds accommodate PSA and AccuShield release liners
- Film shafts swing out for easy loading and unloading.
- Bi-directional productivity allows hot and cold jobs to be run consecutively.
- Adjustable high-quality clutch ensures consistently flat output
- Channeled air cooling system and large chill idler roller eliminate waves in thermal output
- Variable speed foot pedal provides hands-free control and improves handling when mounting graphics
- Maximum speed: 20 fpm

Specifications

- Core Diameter 3"

Other information

- Dimensions 25" x 18" x 13" (W x D x H)
