

# LEDCO Automatic Sheet Feeder

The feeder is completely self-contained and mounted on casters for easy movement. It is precision engineered to a high standard and is quick and easy to set up with a minimum of adjustments.

- **Sheets are separated** at the front by blowers and forwarded by a suction drum mounted over the pile. An adjustable tongue front with integral blowers controls the top sheets in the pile. Suction and blow are delivered by a pump mounted on the frame.

- **The pile table is motorized (hoist)** and controlled by a single UP/DOWN switch. An adjustable limit switch controls the pile height automatically while running.

- **The side register** for feed guidance is mounted above a wide transport belt positioned according to paper size. An independent micro-screw enables sheets to be exactly aligned.

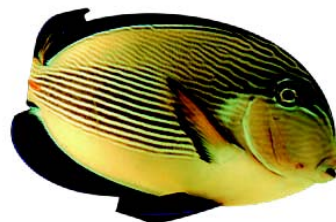

- **Controls** for main switch ON/OFF, speed adjustment and ON/OFF switch for suction roll and belt-drive are located on a central panel.

- **Two-year manufacturers parts and labor warranty.**

## Specifications

Max. sheet size	29.5" x 39.4" / 750mm x 1000mm
Min. sheet size	6" x 6" / 152mm x 152mm
Max. pile height	26" / 660mm
Feeder speed with gear motor	0-100 ft/min / 0-30m/min
Power supply	220 V/60 Hz, single phase, 20 amps
Weight w/o pump	238/450 lbs
Dimensions	35" x 36.7" x 41.5" / 890 x 933 x 1055 mm
Shipping Dimensions	55" x 51" x 43" / 1397 x 1296 x 1055 mm
Weight/Shipping weight	320/450 Lbs
