

MODEL 5500

The Model 5500 Pouch Laminator is our number 1 selling heavy duty ID Card pouch laminator. With a lamination speed of 33" per minute, an adjustable temperature control, an illuminated ready signal and energy saving independent power and heat switches the Model 5500 pouch laminator is built to last for years. Having independent heat and power switches allow you to turn off the rollers eliminating wear and tear on the motor while maintaining the heat setting. This enables you to return to the laminator later in the day and begin laminating without having to wait for the machine to heat up a second time.

This laminating machine has a 4-7/16" laminating throat and will handle all laminating pouches up to 10mil in thickness. It is ideal for any medium to high volume laminating user This is the same brand you will see in most major office supply stores while they charge you a fortune to do your laminating projects.

This laminating machine includes a 5 Year Warranty. After the 5 Year Warranty expires your pouch laminator will be repaired for a fee of \$15 plus shipping. Basically you have a lifetime warranty.
